I am a Marine Science student focused on the intersection of physical oceanography and biogeochemistry. My research investigates subsurface ocean warming trends and sediment carbon stocks to enhance coastal resilience against climate change. I am passionate about utilizing numerical modeling, digital information systems, and data-driven technology to monitor and sustainably manage vulnerable marine environments

Work Experiences

Torgas Laboratory - Jatinangor, West Java, Indonesia

Apr 2024 - Present

Research Assistant

I work at Torgas Laboratory as a Research Assistant. In this position, I am responsible for conducting research in the field of carbon stock estimation in mangrove ecosystems. In addition, I also carry out data collection activities in the field, including measuring vegetation parameters, taking samples, and documenting data to support analysis and research report preparation.

- Part of a research project on Mangrove Carbon Sequestration: Conducting a comparative study on carbon sequestration in artificial mangrove ecosystems
- Java Blue Odyssey 2026: Performed biomass and sediment field sampling across multiple coastal sites in East Java
- Part of the Pangandaran Discovery Trip 2026 project: Quantification of Carbon Stocks in Mangrove Biomass and Sediments, and Characteristics of Microplastic Distribution in the Waters and Mangrove Ecosystems of Pangandaran.

Conservation Indonesia - South Jakarta, Jakarta, Indonesia

Aug 2025 - Dec 2025

Research Assistant

I specialize in oceanographic data processing and numerical modeling, focusing on subsurface ocean warming trends and coastal ecosystem connectivity. My work involves analyzing the spatial relationships between mangrove, seagrass, and coral reef habitats to understand climate impacts and support sustainable marine resource management

- Preparation of scientific journals on coastal ecosystem connectivity, ocean heat content, ocean salinity content, and ocean oxygen content

Education

Padjadjaran University - Jatinangor, West Java, Indonesia

Aug 2022 - Sep 2026 (Expected)

Bachelor of Marine Science

- Responsible for guiding 150 Marine Science students in a Sedimentology laboratory course, covering training in sampling techniques, granulometric analysis, and sediment carbon assessment, with an emphasis on the accuracy of laboratory data collection.

Diponegoro University - Tembalang, Semarang, Central Java.

Aug 2024 - Dec 2024

Student Exchange Aquatic Resource Management

- Enhanced expertise in sustainability and Environmental Impact Assessment (EIA) through an international exchange program.
- Focused on mangrove conservation and environmental economic valuation to support coastal resilience.
- Analyzed the role of coastal ecosystems in carbon stock sequestration and addressing ocean warming challenges

Organizational Experience

Marine Instrumentation and Survey Study Group (KOMITMEN) - Jatinangor, West Java, Indonesia

Aug 2024 - Aug 2025

Head of the Instrumentation and Marine Technical Survey Bureau

A comprehensive marine organization dedicated to enhancing expertise in marine surveys and innovative instrumentation through seven specialized bureaus covering physical oceanography, sedimentology, policy research, and integrated ocean data management.

- Focus on developing members' technical skills, operating marine instruments, and conducting technical surveys to support competence in the field of applied oceanography

Skills and Interests

- **Soft Skills:** Public Speaking, Pitching, Time, Task & Project Management
- **Hard Skills:** Geographic Information System, Python, IOT, and Data Modeling
- **Interest:** Marine Biogeochemistry, Ocean Warming Trends, Sediment Carbon Stocks, Numerical & Inverse Modeling, and Data-Driven Coastal Management.
