Majalengka, Jawa Barat

Bachelor of Marine Science from Padjadjaran University with experience in environmental research, heavy metal analysis, and coastal fieldwork. Experienced in coordinating environmental monitoring projects, laboratory sample management, and data reporting. Detail-oriented, able to follow SOPs, work collaboratively, and eager to learn and develop new skills.

Education Level

Universitas Padjadjaran - Indonesia

Bachelor of Marine Science, 3.44/4.00

- Studied marine environmental science, oceanography, marine ecology, and coastal resource management.
- Conducting research on heavy metal contamination in mangrove ecosystems.
- Experienced in environmental sampling, laboratory analysis, scientific report writing, and statistical analysis.

Work Experiences

Torgas Blue Energy - Jatinangor, Sumedang

Apr 2026 - Present

Project Coordinator

- Coordinate heavy metal monitoring projects in coastal areas.
- Prepare and manage project schedules.
- Coordinate daily activities with project team members.
- Monitor laboratory analysis to ensure compliance with SOPs and quality standards.
- Assist in preparing technical documents and project reports.
- Manage environmental analysis data and documentation.
- Communicate with internal teams to ensure project completion according to schedule.

MBKM PKKM - Pangandaran, Indonesia

Aug 2024 - Nov 2024

Internship

- Assisted in field surveys and environmental sampling activities.
- Supported administrative tasks and documentation.
- Learned government agency workflows and environmental management procedures.
- Improved communication, teamwork, discipline, and responsibility.

Organisational Experience

IMPACT

Oct 2023 - Sep 2024

Head of Research and Development

- Developed field guidelines for sea turtle conservation visits.
- Prepared sampling procedures for research activities.
- Managed publication schedules for marine education content.
- Coordinated task distribution within the division.
- Supervised implementation of division work programs.

THINK GREEN 8.0

Aug 2023 - Nov 2023

Staff

- Assisted in organizing environmental events.
- Supported event planning and implementation.
- Improved public speaking and communication skills.
- Collaborated with committee members to ensure successful event execution.

Skills & Other Experience

- **Technical Skills:** Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Environmental Sampling, Heavy Metal Analysis, Data Entry & Reporting, Scientific Report Writing & Statistical Data Analysis
- **Soft Skills:** Communication, Teamwork, Time Management & Public Speaking
- **Laboratory & Research Experience:** Water sampling and sediment sampling, Heavy metal analysis, Sample preparation for ICP-OES analysis & Environmental data analysis
